Summary

Software engineer, AI agent manager, and Computer Science graduate with a backend foundation in Python (FastAPI) and Java (Spring Boot). Directs agents to ship end-to-end (8 apps built, 6 deployed). Driven by understanding systems from first principles.

Skills

Backend: Java, Spring Boot, Hibernate, Python, FastAPI, SQLAlchemy, Pydantic
Data & Infra: PostgreSQL, MySQL, Docker
Tools: Postman, Swagger, Supabase, Firebase, Vercel, Antigravity
Foundations: System Design, Redis, Kafka, RabbitMQ, AWS, CI/CD, Kubernetes

Projects

Crate | *Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic, React* 2026

- Built a REST API using Pydantic v2 schemas for strict request validation and automated API documentation.
- Implemented SQLAlchemy ORM data modeling in PostgreSQL with a centralized `get_db` session dependency, safe teardown, and startup auto-seeding.
- Created a responsive React dashboard with live inventory metrics, instant search, status filtering, and one-click restocking.

SpringMart | *Java, Spring Boot, Spring Data JPA, Hibernate, H2, Docker, React* 2025

- Built a Spring Boot REST API with custom JPQL multi-field search, pagination, and persistent H2 storage.
- Implemented multipart product CRUD endpoints with validation and direct raw-byte image streaming from the database.
- Containerized the backend with Docker on Render and connected it to a React client on Netlify.

Student Management System | *Java, MySQL, JDBC, Maven* 2025

- Built a modular Java CLI application separating user menus, business logic, and database operations.
- Executed secure MySQL queries via JDBC using PreparedStatements to protect against SQL injection.
- Wrote SQL analytics queries calculating grade distributions, summary stats, and student rankings.

Additional Projects & Achievements

- **Shreyan's Arc**: Interactive DSA roadmap and progress tracker (37 curated problems across 8 patterns) built with React, TypeScript, and Firebase.
- **wrkout**: Minimal workout tracker built with Next.js and Supabase; used daily to track progressive overload and lost 30 kg (66 lbs) in 1 year.
- **WealthWise**: Financial advisory platform with goal-based calculators, bilingual FAQs, and WhatsApp routing, built with Next.js and TypeScript.
- **J-Void**: Distraction-free in-browser Java editor for practicing coding interview patterns, built with React and Monaco Editor.
- LeetCode 50 Days Badge (2024): Top 6.9% globally for consistent daily problem-solving.

Education

B.Tech in Computer Science & Engineering 2021 – 2025
Pailan College of Management & Technology, Kolkata *CGPA: 8.3 / 10*

- **Relevant Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks
